Introducing the new president of AGTS at Evangel

Did you know?

JURASSIC WORLD has now brought in more than half a billion dollars at the box office since its release on June 12. But did you know Evangel adjunct professor Doug Olena is credited for a key element of the look and feel of the Jurassic franchise?

Olena designed the font set used for the promotional materials to go with Steven Spielberg's 1993 blockbuster Jurassic Park. The set is called Nueland Inline, and it was just one of more than a hundred fonts created by Olena living in Vermont.

The set was purchased from a font service, and Olena saw just a small royalty on the sale. Olena is proud of his influence, as the franchise has retained a similar font design through its four films released across 22 years.

At Evangel University, The Quad is known as the common area around the dock tower where friends gather and learn up-to-date information about what's happening on campus. This EU publication is meant to keep alumni informed in a similar way.

Alumni can expect quick articles, video updates and other announcements about the exciting things EU is doing for students and alums.

David Penchansky ('88) presented a paper at the International Qur'anic Studies Association, held in August at Sunan Kalijaga State Islamic University in Yogyakarta, Indonesia.
